EXTRA ACTIVITIES AND HOBBIES

- Foreign Language
- Football
- Music

PROJECTS

Informational Website Design

I created an informational website for a client in the field of Agriculture, with key features such as contact form functionality and WhatsApp orders using the WhatsApp API. I used HTML, CSS, JavaScript and PHP, and made sure the organization's mission and vision is clearly portrayed from design.

Online Portfolio Website

Designed and developed my personal portfolio website using HTML, CSS, JavaScript, PHP, and MYSQL. Implemented responsive design principles to ensure optimal user experience across devices. I Integrated contact form functionality using PHP for server-side processing.

Blog System

Developed a blog system with HTML, CSS, JavaScript, PHP, and MYSQL which allows for main blogging functionalities including secure user registration, posting, and comment section. This project helped me refine my Front-End and Back-End skills and is associated with my self-taught backend web development education.

Ecommerce website design

Designed an e-commerce website interface with product listing pages, cart functionality, and local payment integrations; That is, MPESA and PayPal using HTML, CSS, JavaScript, PHP, and MySQL.
